BUSINESS

Sensible Edible Bakery

BASED IN

Long Island City, NY

THE SHORT VERSION

Who he *is*.

Wassem Moarsi owns and operates Sensible Edible Bakery — NYC's largest gluten-free and vegan bakery — in Long Island City. Twenty-plus years in commercial kitchens. BS and MS in biology.

The Wassem Bakes creator brand teaches real techniques to allergen-free bakers: ratios, extraction, gluten behavior, the actual science — not internet folklore. Every recipe he posts has been stress-tested in production across thousands of units a week.

Sensible Edible Bakery is FDA registered and FSMA compliant, operating out of a 100% gluten-free, peanut-free, wheat-free, sesame-free kitchen. The company's guiding principle: "Food should nourish the body, respect animals, and protect the planet." A portion of proceeds supports animal rescue, hunger relief, and environmental restoration.

wassembakes.com

Direct audience — recipes, ratios, field notes

Audience

Ages 25–55. Health-conscious home bakers, dietitians, GF/vegan parents, premium-ingredient buyers. Skew female, urban and suburban, US primary. Over-indexes on followers who actually bake — high save rates and longer session times than typical food influencers.

WHAT'S DIFFERENT

The *edge.*

Commercial-kitchen techniques, translated to home bakers without losing fidelity.

Content strengths

Commercial credibility. Over two decades running a production kitchen.

Real science. MS Biology informs every recipe — why it works, not just what to do.

Real ratios. Specific weights, temperatures, times. No vibes.

Allergen-free specialty. Fastest-growing food category, built around it before it was trending.

No fluff. No sponsored posts that don't actually fit. Trust stays intact.

Why brands work with him

Production-tested. Every technique he demos runs at scale daily.

Educational, not promotional. Audience trusts the voice — conversion follows.

Cross-platform. Instagram, TikTok, YouTube, blog, newsletter.

Credentialed. Compliance-heavy brands (flours, plant dairy) get a safe pairing.

Values-aligned. Sustainability, allergen safety, real nutrition.

PARTNERSHIP OPPORTUNITIES

Ingredient partnerships — flours, plant-based dairy, specialty sugars, functional additives. Honest integration into actual recipes, not logo drops.

Equipment partnerships — mixers, ovens, scales, bakeware. Reviews that show the tool in real commercial use.

Educational sponsored content — long-form technique series backed by a brand, where the value to the audience is obvious.

Sustainability collaborations — companies aligned on composting, low-waste packaging, regenerative sourcing.

Retail & wholesale — Sensible Edible products available direct and through NYC-area wholesale accounts.

Ready for a *book*.

Wassem is actively looking for a cookbook partner. The foundation is already built: two decades of commercial recipes tested daily, a growing audience actively asking for them, and a positioning no one else owns — allergen-free baking grounded in biochemistry, not guesswork.

Why this book works

Most gluten-free and vegan cookbooks read like workarounds. This one won't. It starts from a commercial kitchen that already makes the best allergen-free baked goods in NYC, then backs into recipes the home baker can actually execute.

- Built-in audience: 85.3K+ on Instagram, growing on TikTok and YouTube, a newsletter list, and a direct-to-consumer bakery.
- Real credentials: NYC's largest GF/V commercial bakery, FDA registered, FSMA compliant.
- Unique angle: biology-backed explanations of WHY each ingredient behaves the way it does.
- Tested at scale: every recipe survives production, not just a photoshoot.
- Platform: already publishing actively, so book launch mechanics are in place.

Let's work.
